## How To - Baubles

1. Download the template from our scrapbook – It should look like a circle shape with a triangle inside
2. Cut out the circle carefully – make sure you also cut out the notches, but don't cut along the dashed line
3. Using a ruler to help you, fold along each dashed line so you're left with a paper triangle shape with three semi-circle flaps. The design that you want to show on your finished bauble should be facing up with the flaps folding over it.
4. Repeat each stage so you have 8 triangles in total.
5. Attach all 8 triangles together by gluing the flaps of one triangle to another – this should then mean one triangle will have three others attached to it.
6. Once all 8 have been attached you should be left with a spherical shape. Just attached a piece of string to one of the flaps and hang it on your tree!
