How To - Paper Chains

1. Choose your paper or card you'd like to use and cut into strips. Your strips can be as long as you like. The length will determine how wide tight or loose your chains are at the end. You can either select a coloured or patterned card or why not leave it blank and make your own designs once you've cut your strips. We like to recycle so try to use materials you'd usually throw away.
2. Loop one strip and glue together at the end to create a ring with the pattern or colour on the outside.
3. With a second strip, create a new ring but loop it through your first ring before you glue the ends. This should create a chain of two rings.
4. Repeat step 3 and continue adding new rings until your chain is at its ideal length.
5. You're done, use pins to attach it to the ceiling where you'd like to display it and add more with different designs!
